CANTON
German loudspeaker tradition

Home Cinema and Music tailored to your requirements

External sound sources for flat screen TVs are the trend in living rooms: because a television's integrated sound system is not sufficient, because a home cinema system is desired or because the sound solution is needed as a connection between the home cinema system and stereo equipment. Canton offers the right sound solutions for all of these requirements.

Compact companions for flat screen TVs

Higher resolution, lower sound quality: When you buy a flat screen today, you will usually also have to buy an additional external sound solution. Our discrete 2.1 front surround sound systems, such as our DM 50, are technically and visually tailored to flat screen TVs specifically and can be used for a variety of purposes as a plug & play solution.

Control centers for home cinema and music

Combining stereo equipment with home cinema systems is becoming increasingly popular. The reason for this is that versatile and powerful 2.1 virtual surround sound systems, such as our DM 90, offer a wide variety of connection possibilities and outstanding film and HiFi sound.

Perfect home cinema requires 5.1

Those who wish to turn their living rooms into home cinemas will also continue to rely on classic 5.1 surround sound systems. The perfectly harmonized components and sophisticated technology of our Movie Systems ensure intense effects, rich bass sounds, clear dialog and thus the consummate home cinema experience.

40 years of sound expertise

All of the sound solutions in the Canton family are technically sophisticated, are of particularly high quality and can be used for a variety of purposes. They benefit from more than 40 years of loudspeaker expertise and offer one thing above all: outstanding entertainment.

How Much Sound Does Your Picture Need?

You want:

- ▶ a compact solution for your flat screen TV
- ▶ a simple system with only one signal cable
- ▶ Canton sound quality for film and music

Our solution: Plug & Play: 2.1 Front surround sound

08

You want:

- ▶ a home cinema system and stereo equipment in one
- ▶ to avoid complex wiring
- ▶ to use sophisticated Canton technology

Our solution: All in one: 2.1 Virtual surround sound center

16

You want:

- ▶ a genuine home cinema atmosphere
- ▶ maximum effects and intense emotions
- ▶ the highest quality Canton home cinema

By the way:
If you would like to expand your current Canton HiFi loudspeaker to a home cinema system or would like to assemble your own home cinema system, you can find the right loudspeaker in our HiFi magazine.

Our solution: Classic home cinema: 5.1 Surround sound system

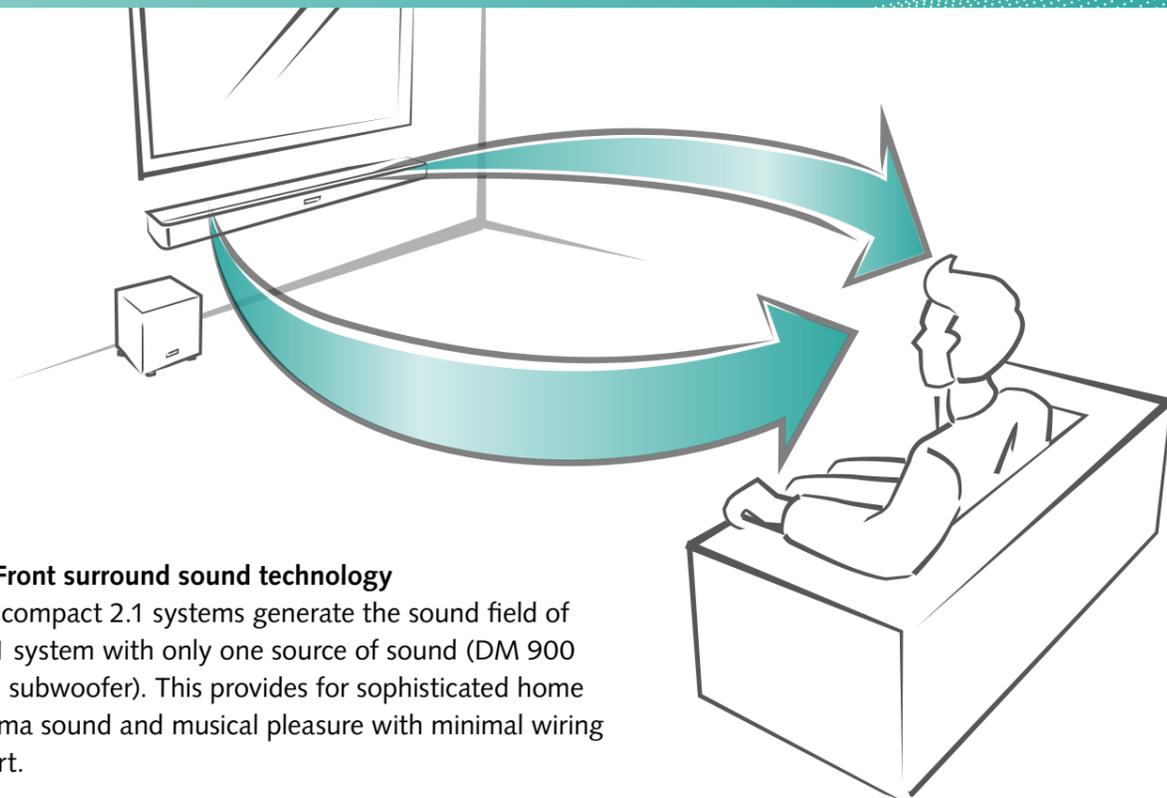

24

Plug & Play: Elegant TV companions turn it up

It was clear when you bought your flat screen that it would not be alone for long. Its new companion was quickly found. You were impressed with its uncomplicated nature and smart appearance. But you were really blown away once you heard what it was hiding on the inside.

2.1 Front surround sound technology

The compact 2.1 systems generate the sound field of a 5.1 system with only one source of sound (DM 900 with subwoofer). This provides for sophisticated home cinema sound and musical pleasure with minimal wiring effort.

Compact sound solution

Powerful TV companions such as the DM 50 soundbar bring flat screen TVs to life and also offer quite a bit in terms of music. All the while, the flat screen remains at the center of the sound solution.

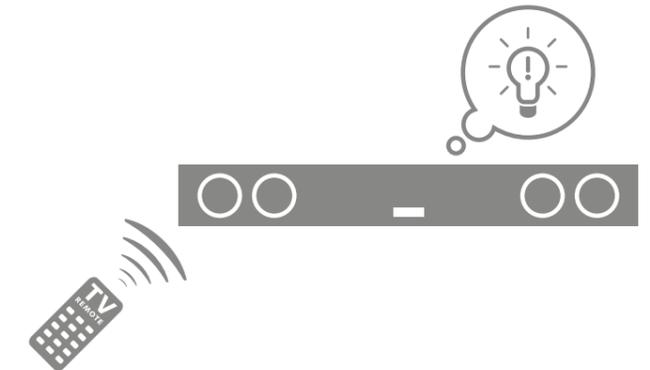

3x POSITION EQ-PRESETS

Setup presets

For placement that is flexible in terms of space and that offers optimal sound, the TV companions (DM 50, DM 9 and DM 900) are furnished with three sound presets. These adjust the sound according to the selected setup location.

Simple to use

The TV companions (DM 50, DM 9 and DM 900) can be controlled via their own remote controls or the television remote. All of the system's remote control functions can be programmed to the television remote control codes in just a few steps. That means that only one remote control is required for both devices.

Plug & Play systems

Maximum sound with minimal wiring effort: If you are looking for a quick and easy solution, you are in the right place. Plug it into the outlet, set the signal cable to flat screen and you are on your way. Of course, if you would like to connect additional devices such as a DVD player or game consoles you can do that too.

Rich bass sounds

Compact dimensions do not preclude a solid low frequency range. Depending on the system, the TV companions have either integrated woofers in the cabinet or external wireless subwoofers.

Discreet technologies

The **LipSync** function balances out the technical delays in the transmission of the picture and sound automatically and thereby ensures optimal film viewing pleasure.

The **Bluetooth** capable loudspeakers enable music to be transferred simply and via a wireless connection from your Smartphone or laptop at optimal quality.

Advantages of our TV companions

- Only one signal cable to the television
- Significantly improved sound
- Surround sound and stereo playback
- Bluetooth interface
- Operable via the television remote control

DM 900

Slimline soundbar with wireless subwoofer

- ▶ Requires only one cable to the flat screen TV
- ▶ Improved speech synchronization of the television sound
- ▶ Can be controlled using television remote
- ▶ Soundbar with wall mount integrated into the cabinet
- ▶ External Downfire subwoofer
- ▶ 300 watt system output
- ▶ Surround sound and stereo playback
- ▶ Bluetooth interface with Apt-X technology
- ▶ 1 x digital input (optical)
- ▶ 1 x digital input (coaxial)
- ▶ 1 x analogue input (cinch)
- ▶ Remote control
- ▶ Dimensions (W x H x D)
 - Soundbar: 89 x 6 x 6.5 cm
35" x 2.4" x 2.6"
 - Subwoofer: 27 x 33 x 27 cm
10.6" x 13" x 10.6"

What you want, how you want it: **A jack-of-all-trades at work**

She has what she wants, and he has what he needs. They are both impressed by the compact and powerful 2.1 virtual surround sound solution. It replaces the stereo equipment and home cinema system without compromising sound but, above all, it offers one thing for both of them: lots of fun.

2.1 Virtual surround sound technology

The powerful DM Systems provide the sound field of a 5.1 system with only one or three sources of sound with a system output up to 350 watts and provide for a perfect home cinema feeling with minimal wiring effort. To do this, they use an intelligent algorithm and loudspeakers with optimal sound dispersion characteristics.

Flexible alternative

Our DM 20 System, for example, is particularly flexible: The satellites can be hung on the wall or placed on a shelf. The compact subwoofer can be placed discreetly in the room and includes all of the electronics.

Versatile connection possibilities

With an integrated tuner, four digital and two analogue inputs, the powerful DM 20, DM 90.2 and DM 200 surround sound systems become the control center and replace classic AV receivers.

Programmable remote control

The adaptive remote operation controls the DM Systems remotely and can also control other devices such as the television and DVD player at the same time. Menu navigation and frequency display for the RDS tuner is realized via the clear LED display.

One system for two rooms

The DM 20, DM 90.2 and DM 200 Systems are multiroom-capable. With these systems, you can connect loudspeakers for a second zone and control them conveniently via remote control. Connecting Canton Wireless active loudspeakers from the your_World series is especially handy.

The **LipSync function** balances out the technical delays in the transmission of the picture and sound automatically and thereby ensures optimal film viewing pleasure.

Powerful subwoofer

Depending on the system, a powerful subwoofer is integrated into the soundbar (DM 90.2) or can be discreetly set up in the room as an external subwoofer with its own cabinet.

Advantages of sound centers

- 2.1. Virtual surround sound
- HiFi stereo sound
- Integrated FM tuner (RDS)
- Versatile connection possibilities
- Adaptive remote control
- Low cable requirement

DM 200

2.1 Virtual surround sound system with two loudspeaker stands

- ▶ 350 watt system output
 - ▶ Surround sound and stereo playback
 - ▶ Downfire active subwoofer
 - ▶ FM tuner with RDS
 - ▶ 2 x digital input (optical)
 - ▶ 2 x digital input (coaxial)
 - ▶ 2 x analogue input (cinch)
 - ▶ 1 x preamplifier output
- ▶ Adaptive remote control
 - ▶ Dimensions (W x H x D)
 - Satellites: 9 x 103 x 9 cm
3.5" x 40.6" x 3.5"
 - Subwoofer: 33 x 24.5 x 35 cm
13" x 9.6" x 13.8"

Effects & Emotions

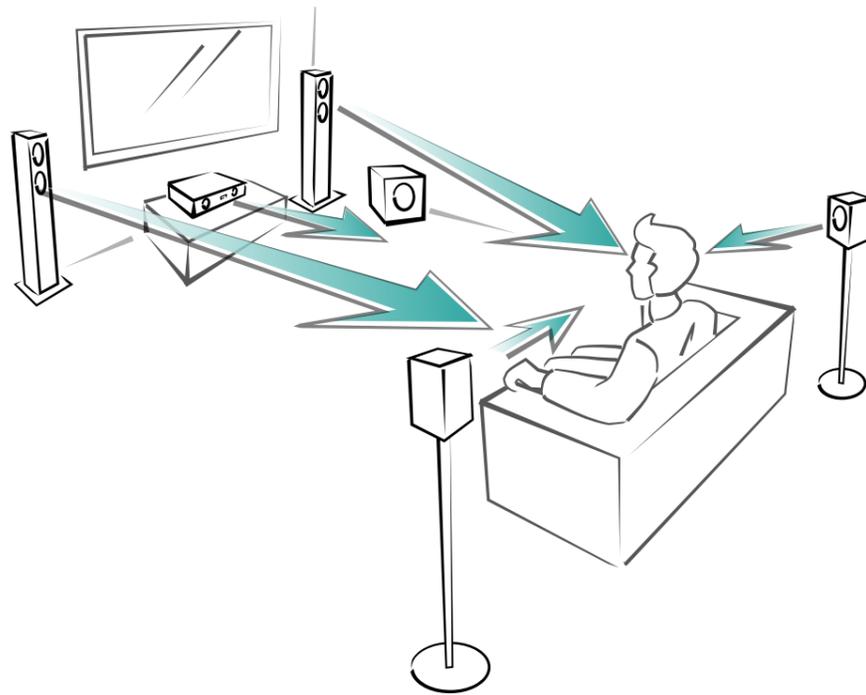

Home cinema systems for film enthusiasts

If you are looking to create a huge cinema feel from your home cinema system, you need exactly 5.1 components: These components ensure crystal-clear dialog, impressive effects and give every film new emotional depth. For you this means only one thing: sit back and enjoy.

5.1 Home cinema system

The perfect home cinema requires six loudspeakers: Two front and two effect loudspeakers, a center loudspeaker and a powerful active subwoofer. Set up optimally, they turn your living room into a huge cinema.

The right sound solutions

Whether it's a powerful high-end system or a compact set such as the Movie 130 for smaller rooms: The versatile range of products offers a variety of systems for the widest range of requirements. They differ in their power as well as the different materials, cabinet styles, surfaces and coatings.

Large center loudspeakers

The main characters of every home cinema system are the center loudspeakers. They convey as much as 70% of the film and music information, and guarantee an optimal sound experience and outstanding speech intelligibility all around the room through a wide dispersion angle.

Powerful active subwoofers

The generously-sized subwoofers with powerful digital amplifiers and long excursion loudspeakers systems convey emotion into our Movie Systems and guarantee a solid bass tone foundation. Thanks to its various set-up possibilities, they can be perfectly adjusted to spatial conditions and personal listening preferences.

Front and rear loudspeakers

Our front loudspeakers are available in a column or compact satellite design, turning the room into a stage, and guarantee a wide base of sound. The satellite rear loudspeakers give the sound spatial depth and guarantee impressive effects.

Advantages of home cinema systems

- Perfect 5.1 home cinema sound
- Optimally harmonized systems
- High quality design
- Powerful active subwoofers

Movie 3050

- ▶ High quality 5.1 home cinema system with loudspeaker columns
- ▶ 250 watt active subwoofer
