8 Entrust your world to us and we'll add the music

12 From heart to heart, without distortion

15 The bloodcurdling sound in this film will make your whole body shudder

16 Our designs are flexible to meet the needs of sound

18 Just look how perfectly concealed they are

22 A passion for music will never corrode if it's water-resistant

26 Water or no water, we don't dampen your enjoyment

28 Music in every nook & cranny. Why ever not?

32

32 An ArtSound loudspeaker sounds more expensive than it actually is

33 The complete guide

MUSIC
REKINDLES THE
MEMORY

Why are some moments, however mundane, not easily forgotten?

Most likely it's because of the music you were listening to at the time.

Maybe a pop song that burrows its way into your subconscious; a riff that you can't get out of your head; a symphonic wave that overwhelms a heated discussion; or a pounding beat that echoes the pulsing of your heart.

There are as many types of music as there are moments that can latch on to your memory forever. With the aid of ArtSound we can help recreate those moments in all their glory.

COMFORTING NOTES

A slow and solemn Leonard Cohen ballad reflects the sombreness of a personal bereavement. It seizes hold of you, helping to soothe the pain. Music comforts at moments you need it the most.

STRIDENT NOTES

An impromptu couch dance, a pulsating dance floor, the throbbing beat of percussion at an outdoor festival, whipping up the urge to shake, sway and whirl. At moments you want to let go, music is liberating.

ENERGISING NOTES

Switch your mind off and the speakers on. Match the rhythm of the playlist to the beat of your daily jog. Music stimulates the moments you aim to push back your boundaries.

www.fcbgovee.be

RELAXING NOTES

Recumbent on a poolside lounge with a relaxing glass of wine. Rocking to the waves on an airbed on a sundrenched sea. Riding the slow twists and turns of a coast road in an open-top car. Music just slips along at moments of blissful indulgence.

FOR ALL THOSE MOMENTS, HOWEVER BIG OR SMALL,
THERE'S A SOUNDTRACK SOMEWHERE TO WARM
THE COCKLES OF YOUR HEART. WITH ARTSOUND
LOUDSPEAKERS YOU CAN EVOKE THEM WHENEVER AND AT
WHATEVER INTENSITY YOU WANT.

ENTRUST YOUR WORLD TO US AND WE'LL ADD THE MUSIC

Some of our competitors just cannot resist. As soon as they clap eyes on you, they'll pull out their glossy brochures, give you the sales spiel and boast blithely about their unrivalled reputation.

**At ArtSound we keep a low profile.
We listen carefully to what you have to say.
We look at your surroundings and address
your misgivings. Only then will we suggest a
solution that meets the musical needs of your
home or working life.**

**That not only makes us smart,
but you too.**

WE LISTEN TO WHAT DRIVES YOU AT CLOSE QUARTERS.

It goes like this: you make the appointment and we will invite you to sit in our listening room. We call it that because you can listen to our products there. Ask as many questions as you want. It's handy to bring along a floor plan, a deadline and an estimate of your budget.

AN ENTIRE SERVICE AT YOUR SERVICE.

At that point we'll call in our technical staff. Backed by years of experience and high-tech know-how (perhaps a bit cliché, but nonetheless true), we'll draw up a plan which is dovetailed to the requirements of your home and working life. This comes complete with the models and the number of loudspeakers, the acoustics of your surroundings - from lounge to workfloor - the need for an amplifier, the type of connection, cable or remote control, etc. In short, we'll give you a well-thought-through, ready-made proposal which is geared up to your needs and budget, and all free of charge.

FROM HEART TO HEART,
WITHOUT DISTORTION

**Music which comes from the heart must go to heart of the listener directly.
Without any ado, distortion or interference.**

ArtSound's loudspeakers take their task seriously, reproducing both brash and broody passages in equally faithful measure and sending them straight to the ears and hearts of listeners, wherever they find themselves. We can help you choose the models that most closely fit the tasks you want them to fulfil.

**FOR EXAMPLE, IN A FASHION STORE THEY NEED TO
CREATE AN AMBIANCE, IN A WAREHOUSE THEY HAVE TO
CONVEY INFORMATION CLEARLY, IN A RESTAURANT THEY
MUST KEEP CUSTOMERS AT THE TABLES, AND IN THE
LIVING ROOM THEY MUST ROUSE THE LISTENER.**

A COMPLETE RANGE

A music system with loudspeakers and an amplifier convert electrical signals into audio signals, which reach our ears through vibrations in the air. Over the years, ArtSound has been specialising in perfecting this process and, in doing so, we've become the experts.

It's no accident that - as market leader - we're able to sell a complete range of loudspeakers. Some, of course, are more stylish than others. And some less compromising when it comes to audio quality. Whatever level of sound quality you want, we have a loudspeaker to match your needs. And at a price that will be music to your ears.

UNADULTERATED INWALL GEMS

Don't expect ArtSound to give you any fancy technical gimmicks that make your loudspeaker sound more highly strung, i.e. more commercial. We swear by pure sound reproduction, in all intonations and with the minimum of distortion. Our high-tech **intimi**, for example, incorporates a double filter which brings about a sophisticated range of intonations. This series of sleek inwall jewels prove exceptionally strong in the mid-tones, which make up about 60% of sounds that humans themselves produce.

“OUR LOUDSPEAKERS ARE BUILT ON THE PREMISE OF AUDIO QUALITY. THAT WILL VARY DEPENDING ON WHAT THE CUSTOMER WANTS: INFORMATION, MOOD-SETTING, DANCING, LOW-KEY LISTENING, ETC. WE HAVE A SPEAKER TO SUIT ANY OCCASION.

MARC GOOVAERTS, SOUND ENGINEER

WALL-TO-WALL BALANCE

When it comes to acoustic prowess, our **intimi**, **happi** and **sonar** series are more than up to the mark. They are able to fill every nook and cranny of a room with warm sounds, so that anyone near the speaker doesn't have to worry about a surfeit of decibels. Nor will someone further away have to put an ear to the ceiling just to catch the music. A volume that will blow your socks off: it ought to be possible, but well-balanced across a wide spectrum.

Intimi p 45 // Happi p 55 // Sonar p 102

HELP

THE **BLOODCURDLING SOUND** IN THIS FILM WILL MAKE YOUR WHOLE BODY SHUDDER

Until not so long ago, film buffs were being bombarded with all kinds of surround systems. They filled their lounges not only with noise, but with loudspeakers of every shape and size. ArtSound does things differently. We take up less space and give you better sound quality in return.

IN THE MIDDLE OF THE FILM, BUT ALSO IN THE SONG

Our solutions enable you to immerse yourself in surround, but also with a pure sound quality that you can enjoy even when you're not watching the film. Take the AS350s from the compact **Sonar** series, for example. Just two of them are enough. Their high polish wooden conical cabinet provides your interior with a sleek, classy touch. Together with the central **ASC350** loudspeaker, they deliver a refined, superior sound. They form a complete theatre set with the compact subwoofer **ASA65** or **ASA80** in the original cube shape. Or with the **FL-A80**: this is even smaller and easier to use, concealed behind a curtain or in a sideboard.

Sonar p 102

**OUR DESIGNS
ARE FLEXIBLE TO
MEET THE NEEDS
OF SOUND**

Design means styling. And we provide style in its purest form. Not just to be easy on the eye. Our designers aim to do justice to the excellence in sound created by our audio engineers by achieving the same level of superiority in design. The result: loudspeakers that are as easy on the eyes as they are on the ears.

“OUR DESIGNS ARE AN ODE TO SOUND. OUR AIM IS TO RENDER THOSE CASTING THEIR EYES AND EARS ON OUR LOUDSPEAKERS SPEECHLESS.

JAN PIETERS, HEAD OF DESIGN.

RESOUNDING NAMES

The latest creation from ArtSound, **Kurv**, responds to the needs of tomorrow, in terms of sound, vision and technology. Our **Intiimi** will conceal themselves discretely in any interior, but in reality their slender aesthetics - with their perfect angles and finely meshed grill - deserve their place in the spotlight. The **AS410** has been given a slightly curved housing of high-gloss glass fibre, giving it a modest elegance. Finally, the compact **Universals**, with their bevelled corners and sober design provide a surplus of timelessness. They are best done justice to with the quartz colour.

DESIGN GIVES SHAPE TO SOUND

Are your loudspeakers nothing more than showpiece items in a pursuit of status? If so, then ArtSound is not for you. However attractive our speakers may look, first and foremost, they aim to gratify the ears. For that reason, our designers work intensely with our audio engineers in order to achieve the loudspeaker you aspire to: a mood-creator in the background, a powerful tool to produce the music you love in every detail, a transparent conveyor of information. And one that is perfectly adapted to your surroundings.

DESIGN IS HERE TO STAY

At ArtSound we try to make our loudspeakers as timeless as possible. That means for 15 years - their normal lifetime expectancy. We don't think you'll mind having us around for that long. Our designs therefore provide you with a good insight into our vision of the future. Not boastful, but unadulterated. Not outlandish, but discrete.

AS410 p 108 // Universals p 110

Intiimi p 45 // Kurv p 116

JUST LOOK HOW PERFECTLY CONCEALED THEY ARE

Before we even get to the drawing board, at ArtSound we lend a listening ear to our customers. Nowadays, the only place you're likely to find a loudspeaker as big as a phone box is in the lounge of an ageing hippie.

For those who prefer more modestly sized speakers, we design aesthetically attractive masterpieces. If you'd rather not see them, we can arrange this too. We'll simply make them vanish into the background of your daily decor. We're able to do this because they are so slender - and you can even spray them in the colour of your backdrop. Design as a disappearing act, not least because it's the sound, not the vision, that really matters.

SLIMMING OURSELVES DOWN

Intiimi stands for 'pure intimacy' in Finnish. For these inwall speakers, ArtSound brings about spatial intimacy in both sound and vision. The frame of the finely meshed grill is just 1 mm wide and the entire grill is only a few millimetres thick. The **Flat** and **Happi** series too can be swallowed up by a wall or ceiling. **Happi** is Finnish for open, and these loudspeakers certainly open up your world (and beyond), by sending out sound vibrations in their most open, purest and warmest form.

“OUR INWALL SPEAKERS HAVE BEEN BORN OUT OF THE COLLABORATION BETWEEN OUR DESIGNERS AND OUR SOUND ENGINEERS. WE FEEL THAT OUR CHILDREN SHOULD BE HEARD AND NOT SEEN.” DIETER VANHOENACKER, SENIOR PRODUCT MANAGER

ADD A DASH OF COLOUR

If you want, you can integrate the **Intiimi**, **Flat** or **Happi** even more: just paint them in the colour of your decor. With an aerosol of course: a paint brush will cover the holes on the grill. You can do this too for the onwall speakers: the **Extended** and **Basic** series, with the exception of MD30 and MD50.

Flat p68 // Basic p78 // X-tended p63 // Happi p55

A **PASSION** FOR MUSIC WILL NEVER CORRODE IF IT'S WATER-RESISTANT

THE CLIMATE MIGHT WELL BE CHANGING, BUT DOES THAT REALLY MEAN WE HAVE TO CHANGE OUR GOOD HABITS?

We can see you shaking your heads along with us on this. If it rains during a barbecue, you can take shelter under a parasol or awning. The mood however, remains unaffected since your water-resistant inwall and onwall speakers will continue to spout forth even if they're in the shower.

WHISTLE WHILE YOU SWIM

Swimming up and down the pool on a wave of classics, from Bach to Bacharach? If that's what you want, why not install the **Waterproof** series? All parts are waterproof and remain uninfluenced by extreme temperatures. What's more they have a higher spread differential, which means the music carries further. Which means they are also suited to larger patios.

TOUGH COOKIES

Do you want your listening experience to be relaxing or invigorating, wherever you are? The portable radio boosters U3 and U6 can accompany you wherever you go, from the factory floor to the campsite. Under their tough exterior lurks a powerful tuner and wonderful bass tones.

DON'T STOP THE RAIN

Don't let a bit of rain spoil the party. Our loudspeakers, from their interior workings to the bracket, won't come apart because of the weather. Like gardening to the sound of music? No need for a singing garden gnome: our **Kurv** will do the trick. Or hang an **Outsider** on your patio and have it transmit its warm and clear sounds into the rest of the garden. The outsider in this particular range of speakers is the **Rock** - yes, you've guessed it, in the shape of ... a rock! It gets swallowed up into your garden, as you do by the quality of its sound.

WE MAKE A POINT OF OFFERING OUR CUSTOMERS MUSIC FOR WHEREVER THEY GO. THAT MEANS OUTDOORS TOO. SOME MODELS CAN BE LEFT OUTSIDE IN WHATEVER WEATHER - COME RAIN OR SHINE THEY WILL CONTINUE TO DO THEIR WORK. DEVY VAN

CAUWENBERGHE, PROJECT MANAGER

WATER OR NO WATER, WE DON'T DAMPEN YOUR ENJOYMENT

Sometimes, we like a bit of water or steam. In the bathroom or sauna, perhaps. Make your enjoyment complete by having your favourite music simply gush out of your speakers. Their special coating or parts are able to resist damp and even water.

INDOOR FUN

Immerse yourself within the confines of your bathroom or sauna. The **X-tended** inwall series only intensifies the sense of rest or relaxation, without it suffering from an odd splash of water or condensation.

MINIMUM DESIGN, MAXIMUM ENJOYMENT

Some people like to while away their time in a long hot bath. Others would rather punish themselves in the gym. What do they have in common? Yes, the warm, full sounds emanating from the well-nigh invisible Happi inwall speakers. They feel as much at home in their damp environments as listeners do themselves.

Happi p55 // X-tended p63

DO YOU HAVE A RESTAURANT? SPICE UP THE LIVES OF YOUR KITCHEN STAFF WITH AN X-TENDED OR HAPPI. BOTH INWALL SPEAKERS CAN STAND UP TO THE DEMANDS OF A STEAMY KITCHEN.

MUSIC IN EVERY NOOK & CRANNY.

WHY EVER NOT?

YOUR TASTES ARE CATHOLIC, WHICH MEANS THERE'S A GENRE TO SUIT EVERY MOOD. BUT, THAT DOESN'T MEAN YOU HAVE THE SPEAKER TO EVERY SURROUNDING, WHETHER IT BE THE SMALLEST ROOM IN THE HOUSE OR THE LARGEST OF MANUFACTURING UNITS.

ArtSound does however. The right model, the right number, the right audio distribution system: we're happy to throw some light on the myriad of options available. After all, we have pretty catholic tastes too.

ART3.1BT: THE SMART MUSIC BOX

Do you like to have music with you in the kitchen? Insert the one and only **ART3.1BT** from ArtSound alongside your inwall loudspeakers in your false ceiling. Via your remote control, this box will automatically start searching its built-in tuner, a Bluetooth device or an external source.

I ALWAYS WANTED THE MUSIC OF MY OWN CHOOSING IN MY OFFICE. STICKING AN ART3.1BT IN THE CEILING WAS THE ANSWER. ONE PRESS OF THE BUTTON ON THE REMOTE AND I GET THE RADIO STATION OF MY CHOICE, MY IPOD PLAYLIST AND MY STREAMING SITE DIRECT IN MY OFFICE.

EVY DE PUTTER, BLOGGER AND ART3.1BT ADMIRER

SO WHAT ABOUT DECIBEL LEVELS?

Not everyone in the house has the same need for music at the same time. Our **SVC4.2** and **SVC6.2** volume controls enable you connect 4 to 6 pairs of speakers to one amplifier output. With the dials on the front panel, you can set the volume for each pair of speakers separately and create six different volume zones. The volume control ensures that your amplifier does not get overloaded. The rubber trimming has a nice feel and is in perfect harmony with your hi-fi system.

UNIVERSAL TIP: THE SMALL UNIVERSALS FROM ARTSOUND HAVE A SPECIAL BASS REFLEX HOUSING WHICH DELIVERS HIGH PERFORMANCE TO ANY ROOM. YOUR TOILET, KITCHEN, OFFICE, SHOP, CAFETERIA... YOU MAKE THE CHOICE.

GET ACTIVE!

Because life without music is unimaginable, we get enormous pleasure out of lowering the music threshold. That's why we've activated our **Flat** and **Happi** inwall boxes. No separate amplifier needed, that's in your loudspeakers already. With Bluetooth® they can access your favourite music from a streaming service or the radio in any room. And what's more, the patented drivers help treat your ears to the ultimate sound quality experience.

Multiroom p 136 // Active p 38

AN ARTSOUND LOUDSPEAKER SOUNDS MORE EXPENSIVE THAN IT ACTUALLY IS

Young start-ups don't often have the financial wherewithal to call in an audio technician. With ArtSound, it's possible to buy and install the sound quality they need themselves. For example, mood music might fit the bill for a delicatessen. Someone starting a cocktail bar however, might want a higher level of sound quality. With a luxury apartment, a classier design might be more appropriate. In whatever professional or personal capacity you may find yourself, you can now choose the loudspeaker that best matches your needs from our diverse range of products. And at a price that matches your pocket.

inwall loudspeakers

AN INTROVERT DESIGN WITH AN EXTROVERT PERSONALITY

It's an unwritten rule which hi-fi enthusiasts are only too keen to endorse: loudspeakers should be heard and not seen. Whilst giving clear and faithful sound reproduction without distortion, they should do so without stepping into the limelight themselves. It's with this philosophy in mind that ArtSound designs its inwall speakers. The discrete design and advanced technology serve just one purpose: listening enjoyment.

Active

THESE VIBRANT INDIVIDUALS HAVE A SOOTHING EFFECT

We have now created wireless versions for four of our top models. And there's more to it than just getting rid of the wires. For example, you can operate them from smartphones or tablets and have the music broadcast from any kind of source, from MP3 to streaming radio, in active, crystal-clear sound.

BUILT-IN CONVENIENCE

We've revamped four models in our Flat and Happi series as technically sophisticated, active loudspeakers. Anyone who takes one of these on board is making life so much easier for themselves. They have their own amplifier, which closely tracks your smartphone or tablet by means of Bluetooth®. There's no longer any need to train your remote on the amplifier each time you go in and outdoors.

THE FUTURE IS NEVER FAR AWAY: IN THE WALL OF YOUR PATIO OR IN THE CEILING OF YOUR KITCHEN. THE ACTIVE MODELS IN THE FLAT AND HAPPY SERIES ARE CREATURES OF ADVANCED WIRELESS AUDIO TECHNOLOGY INTENDED TO CREATE OUTSTANDING USER PLEASURE.

WIRELESS BEAUTY

Whatever music you want, either indoors or outdoors, can be taken from any kind of source: MP3, streaming media and radio. What's more, the built-in amplifier is a superior D class. Together with the patented ArtSound drivers, both serious listeners and boisterous revellers will have their ears pampered with this.

HPRO650BT

HPRO650BT transforms ultimate comfort in masterly design. Thanks to some ingenious remodelling, this frameless speaker with its ultra-sleek grill can be installed effortlessly in any kitchen, living room, patio or bathroom, because it can be used indoors and outdoors. What's more, the aluminium woofer helps generate extremely detailed sound able to carry exceptional distances. The built-in class D amplifier with Bluetooth® on board provides endless enjoyment.

DIMENSIONS

Intiimi

AUDIBLE AND VISIBLE BEAUTY

Intiimi stands for 'purity' and 'pure intimacy' in Finnish. It's with this in mind that ArtSound has designed this series. This range consists of highly compact speakers which emanate warmth but also impressive-sounding, larger and more powerful speakers.

Intimi

ORIGIN OF THE WORD: FINNISH

MEANING: PURITY, PURE INTIMACY

UNBOUNDED INTIMACY

ArtSound spent two years developing the Intimi. We think the results should be seen as well as heard. This range of uncompromising loudspeakers exudes a quality that is world-class in terms of both aesthetics and acoustics.

HEAVENLY DESIGN

The Intimi series excels in its inconspicuousness. With an almost frameless grill of 1 millimetre and a thickness of just under 5 millimetres, this loudspeaker gives short shrift to modern-day standards.

SUPERLATIVE SOUND

Intiimi is an exquisite palette of superior components. The grill conceals an elegant curving front panel and a unique tone control. The custom-designed titanium driver with a powerful neodymium magnet and a patented suspension can be adapted to suit your own taste. Gilded cable connections ensure minimum resistance.

The advanced crossover and correction filter – patented by ArtSound – purify the amplifier's signal. The basket has been cast with the front panel as a single unit to provide rigidity. In all imaginable situations, Intiimi is able to produce a high-quality, harmonious sound, with a perfect balance between high, middle and low tones.

With a 1mm grill and a mere of 5mm thick, the intiimi series is unusually discreet. The sound quality stands out thanks to the patented filter, among other components.

SUNKEN IN THE INTERIOR

Thanks to the flush mount, Intiimi blends in harmoniously with the ceiling. This is a handy inwall kit that allows you to align your speaker completely flush in the ceiling.

Flush mount kits p 98

RO2040

With an almost frameless grill of 1 millimetre and a thickness of just under 5 millimetres, this loudspeaker gives short shrift to modern-day standards. The titanium driver with neodymium magnet and patented® suspension allows you to point it in any desired direction. The Intiimi series purifies the signal from the amplifier via an advanced separation filter and a correction filter. The front plate and basket are moulded from one piece which helps reduce resonance. The RO2040 is very compact, but holds its own in every high-end kitchen or cosy living room.

- ① swivel tweeter in an acoustic shell
- ② manual treble control

The perfect high-end speaker for architectural spaces, in your home or at the office.

SQ2040

With an almost frameless grill of 1 millimetre and a thickness of just under 5 millimetres, this loudspeaker gives short shrift to modern-day standards. The titanium driver with neodymium magnet and patented® suspension allows you to point it in any desired direction. The Intiimi series purifies the signal from the amplifier via an advanced separation filter and a correction filter. The front plate and basket are moulded from one piece which helps reduce resonance. The SQ2040 is very lovable; extremely compact but capable of world-class performance given its size.

- ① swivel tweeter in an acoustic shell
- ② manual treble control

SQ2040, a hip, square speaker for top results without even being visible.

A loudspeaker singles itself out through its inconspicuousness. Let this now be the DNA of the SQ2060.

RE2040

With an almost frameless grill of 1 millimetre and a thickness of just under 5 millimetres, this loudspeaker gives short shrift to modern-day standards. The titanium driver with neodymium magnet and patented® suspension allows you to point it in any desired direction. The Intiimi series purifies the signal from the amplifier via an advanced separation filter and a correction filter. The front plate and basket are moulded from one piece which helps reduce resonance. You can build the RE2040 into a ceiling, but also into a wall. Almost imperceptibly flat, you can even paint over it without a problem.

- ① swivel tweeter in an acoustic shell
- ② manual treble control

At home or at the office? The RE2040 was developed to be an allrounder, but no matter what the application, it always provides top performance.

High-performance surround set?
The RE2060 is the ideal front speaker
in this type of system.

RE2080

With an almost frameless grill of 1 millimetre and a thickness of just under 5 millimetres, this loudspeaker gives short shrift to modern-day standards. Behind the grill is a curved front plate engraving with an elegant style and a unique tone controller. The titanium driver with a powerful neodymium magnet and a patented® suspension may be adjusted to suit your taste. The Intiimi series purifies the signal from the amplifier via an advanced separation filter and a correction filter. The front plate and basket are moulded from one piece which helps reduce resonance. Musically, the RE2080 is the pick of the bunch. With its advanced three-way system, it provides power as well as refinement. Not only the tweeter, but the midrange too is embedded in a swivel shell.

- ① swivel tweeter in an acoustic shell
- ② manual treble control

Our top model: divine sound in every detail.

DIMENSIONS

Happi

WATER-RESISTANT AND MINIMALISTIC

Happi is a Finnish word which means 'open' and 'oxygen'. Their sleek design is characterised by a wafer-thin chassis and built-in magnets under the grill. The special filter, woofer and (swivel) tweeter provide a pure, warm sound. Both its interior and exterior are robust enough to resist a splash or two of water.

HPRO525

Treat yourself to some oxygen. Happi is a Finnish word which means open, oxygen. This HPRO525 makes the ideal partner. It creates the perfect mood for letting off steam, both literally and metaphorically. Thanks to the aluminium woofer and the swivel tweeter, it carries every detail a long distance.

- ① aluminium woofer for higher output
- ② aluminium grill with water-resistant magnetic system
- ③ swivel tweeter

Steam in your bathroom, both literally and metaphorically: the HPRO525 does the business!

DIMENSIONS

X-tended

NOT A SPATTER OF IMPURITY

Due to its aluminium woofer, (swivel) tweeters and special filter, the X-tended has an extensive timbre: pure but warm, with lovely deep bass tones. Given their discrete look and water-resistance, this series is as much at home on the outdoor patio as it is in the bathroom.

RO525.2

With the X-tended series, the future can be yours today. A strong example of new technology: aluminium woofers, swivel tweeters and an extensive sound filter. You can hear the result in the deep basses and the clear reproduction. Ideal for use in kitchens and bathrooms.

RO525.2 in its natural habitat: the bathroom.

The RE650.2 is the most powerful X-tended loudspeaker. It may be installed in larger spaces, such as this clothing store.

Flat

MORE EASILY HEARD THAN SEEN

The frame of the Flat series is 1 millimetre in width and 4 millimetre deep. The finely meshed grill is like silk to feel: sober and almost invisible, but at the same time rich in sound. The Flats can be installed in an instant with click screws and the magnetic grill.

FL101

This inwall loudspeaker is flatter and even less visible than all its predecessors. The frame was reduced to just 1 millimetre, yet continues to score high in terms of vibration absorption. The loudspeaker's grill has also been noticeably fine-tuned and almost feels like silk to the touch. The sound is accurate, warm and carries far. A no-bones-about-it speaker.

The FL101 is a real hit. It leaves no space untouched: the corridor, waiting room, kitchen, ... you can even paint it over in your favourite colour.

Basic

THE AFFORDABLE POWER OF SIMPLICITY

The Basic is a no-nonsense loudspeaker, specifically designed for those who want inwall robustness for an attractive price. The Basic is soberly designed, but highly versatile. So much so, that it's at home almost anywhere: in the toilet, living room, shop or canteen.

MD30

The MD30 is not much larger than an average spotlight, but incorporates an exceptionally warm sound generator. This makes it particularly suited for use in modern or renovated buildings where design and architecture are high on the agenda.

This MD30 doesn't need a lot of room to provide warm background sound.

DIMENSIONS

MDC650

This round inwall loudspeaker produces a full stereo sound all by itself. It was specially designed for more confined spaces (waiting room, toilet, small hall, ...). This world-class unit owes its special qualities to the built-in woofer, filter, 4 contacts and a double (!) tweeter.

DIMENSIONS

TECHNICAL SPECIFICATIONS

range	<50m ²
sound quality	allround
system	stereo speaker
woofer	6.5" injection cone rubber
tweeter	0.5 x 2" neodymium aluminium dome
amp power	20 - 120W (recommended)
sensitivity	87dB
impedance	8Ω
frequency range	70Hz - 20kHz
dimensions cut-out (Ø)	195mm
dimensions (Ø x d)	230 x 85mm
weight / piece	1.2kg

colour	white
features	paintable grill
options	acoustic kit (KITR03)

No room for two loudspeakers?

The MDC650 gives you the full stereo effect, all by its lonesome.

DC101

Prefer a sleeker look? If so, the DC101 is what you're looking for. No frills, just a trusty soldier that can handle both high-strung techno and soothing classical. You'll be keen on its price and performance.

The DC101 is sleek yet flexible. Super user-friendly, you can set it up in a variety of rooms in the blink of an eye.

TECHNICAL SPECIFICATIONS

Residential villa, Zottegem

Waterproof

COME RAIN OR SHINE, NO MATTER WHAT THE DISTANCE

However extreme the humidity, the Waterproof loudspeaker doesn't shirk its responsibilities. What's more, extreme temperatures have no effect on this series of speakers. They are real mood creators, by the pool or outdoors, and able to disseminate sounds far and wide.

⚠ Note: for use indoors we generally recommend loudspeakers from the Happi / X-tended series.

MDC6

These waterproof models are hermetically sealed at the back. The woofer and tweeter are also manufactured from waterproof materials. These models may be used in 'damp spaces' such as saunas, steambaths, gardens, warehouses, stables or industrial facilities.

The MDC6 is a 100%-waterproof model, suitable for extreme applications, both indoors and outdoors.

MDC64

These waterproof models are hermetically sealed at the back. The woofer and tweeter are also manufactured from waterproof materials. These models may be used in 'damp spaces' such as saunas, steambaths, gardens, warehouses, stables or industrial facilities.

The MDC64 may be found at many swimming pools, but also holds its own in industrial applications.

DC84

This is the very first rectangular design in this genre! Not only does the DC84 satisfy all the stringent quality standards, but it is also perfectly geared up to various applications, such as in swimming pools, patios, saunas, jacuzzis, etc.

The DC84 even goes to extremes, even indoors.

inwall solutions

SAFE AND EASY INSTALLATION

At ArstSound we want our customers to be able to enjoy our loudspeakers as quickly and as effectively as possible. For that reason we have a number of handy kits to help install our inwall speakers in next to no time. Even in more demanding situations.

And if necessary, protected against dust and damp.

DUST KIT

These PVC kits aren't used for the purpose of fitting loudspeakers into the ceiling or in the wall. All you need to do is slide them over the interior workings, giving them protection from dust, moisture and other unwelcome influences.

	KIT R0105	KIT R0135	KIT R0212	KIT R0238

Maison - D. Belgium

onwall speakers

You don't need to look impressive to sound convincing. For that reason we specialise in the development of compact loudspeakers. Nothing bombastic.

Instead style with power. We came up with eye-catching designs for trendy interiors, but also with timeless gems which can more than hold their own in any surroundings, delivering excellent audio quality at an affordable price.

Sonar

CONICAL QUALITY

Sonar is a bit of an outsider in a rapidly changing world, in which style, speed and substitution are otherwise the order of the day.

With Sonar, ArtSound is returning to the very essence: timeless quality. With its designed-packaged timbre, the Sonar series even has woofers with a rubber suspension. In combination with their improved drivers, these speakers have become atypical.

AS150

An exceptional design in a high-quality cabinet. In combination with the fibreglass woofer in a wooden frame, the special tweeter is absolutely unique. The warm colour is a dead giveaway for the sound: deep basses and high-quality mid-range, enhanced by a strong wave of high tones. Perfect for every modern interior. The AS150 produces up to 100W without any distortion.

The AS150 doesn't need a lot of space to fill a room with sound. It can also serve as a component in a true home cinema set.

The ASC350 in action: every swallow,
every tiny breath caresses your ear in a
very intimate way.

AS410

The AS410 is extra unique. Manufactured from fibreglass, it is flexible yet sturdy, and perfectly suited for producing music. Its slightly curved design and high-gloss black or white finish make it discreet yet also incredibly elegant. The specially designed driver unit ensures a clear, warm sound. This makes it suitable for use both as a stand-alone and in a home cinema set-up.

① The plug-in screw adaptor greatly simplifies the way the speaker cable is connected.

The AS410's unique design makes it a real eyecatcher. Just right for those looking for something different, without the need to sacrifice sound quality.

Universals

LEFT OUT IN THE SERVICE OF SOUND

More than 20 years' experience bound up into every detail of your loudspeaker: these are the Universals. The sleek front panel, in combination with their rounded angles, give an all-round quality. Together with their unique bracket, enabling all kinds of alignment, they can adapt to any decor. And their patented drivers can take on any musical preference. Simply put: universal deployment with an eye for every detail.

UNI20

This loudspeaker has a neutral design, with a strong housing. It generates great performance output as a result, in spite of its compact dimensions. This loudspeaker is suitable for use in smaller spaces, such as a corridor, small kitchen, toilet, etc...

① This specially designed bracket is multi-functional and allows a quick mounting. Thanks to the ball and socket joint, you can align it in any direction you like, even horizontally.

② The plug-in screw adaptor greatly simplifies the way the speaker cable is connected.

The UNI20 may be very compact, yet generates a warm sound thanks to its two-way system.

Outsiders

TOUGH IN ANY CLIMATE

Come rain or shine, music is as just as much an outdoor happening as a poolside lounge or cocktail. To this end, ArtSound has created the Outsiders, conspicuous because of their conspicuous form. Each of the five outdoor models has its own format and has been designed to produce its very own, but nevertheless ever powerful and warm timbre.

KURV

Organic means “characterized by a harmonious relationship between the elements of a whole”.

In short, derived from and consumed in its natural setting.

Only a timeless design can help bring this about, one which combines opposites: sleek, but pliant; refined yet tough; both water-resistant and sun-proof. Superior design for an affordable price. A style icon with warm vibrations.

In fact, too many qualities to fit into just one sentence. That’s why we’ve christened it KURV. Literally, pure and undiluted, a powerful loudspeaker which caresses the eyes and ears.

The Rock is actually made to disappear, between high grass, rocks, flowers and plants. You may not see it, but you'll hear it just the same.

ASW45.2

Minimum proportions, maximum waterproof protection. As the latest addition to the line, this is what the ASW45.2 represents within the waterproof products category. Designed using the newest acoustic technology, this speaker is amazingly powerful yet discreet thanks to its modest dimensions. The unique curved shape produces a clear, warm sound performance. Thanks to the indoor-outdoor switch, this speaker provides pure musical enjoyment, outdoors (terrace, garden, etc.) as well as indoors (sauna, bathroom, swimming pool).

Although you'll usually find the ASW45.2 on a terrace, it can provide background music for the entire garden, summer and winter.

ASW55.2

The ASW55.2 is one of the ultimate models among waterproof loudspeakers.

It incorporates the newest acoustic technology and is amazingly powerful yet discreet. The unique curved shape produces clear, warm sound performance. Thanks to the indoor-outdoor switch, this speaker provides pure musical enjoyment, outdoors as well as indoors. In addition, the bass reflex may be hermetically sealed using the tube supplied.

subs

MAKING THE PALETTE OF SOUND COMPLETE

Subs, or subwoofers, are like a fireplace in your lounge. They bring warmth to a room. Subwoofers are used to supplement the sound spectrum of smaller speakers, helping to enhance the experience of music, but also of film.

These active subwoofers each has its own amplifier which dissipates low tones equally throughout the room. A subwoofer like this can fill large spaces all on its own and enrich your musical experience. What's more, the dials allow you to adapt them to rooms of any shape and size.

ASA65

Cube is cute! A subwoofer doesn't have to be an eyesore anymore. With the ASA65, ArtSound has produced an active subwoofer, packed into a compact cube design. The rounded corners soften the speakers' look. The smallest of the two has a 6" patented driver that allows you to easily add space-filling bass to your living room. It is super easy to combine with the AS250, ASI50 and others. Together with the new ASC350 center speaker and the AS350, you can even create a unique home theatre set.

Sound as warm as this image? No problem. The cube guarantees it, both for music as for films.

COLOURS black

TECHNICAL SPECIFICATIONS

range	<50m ²
system	bass reflex system with passive membrane
woofer	6" polymica
bass reflex	folded bass port
magnetic shielded	no
amp power	60W / 120W

dimensions (h x w x d)	285 x 285 x 320mm
weight / piece	9.9kg
composition	MDF
colour	black
features	individual volume control phase control high-level inputs

Thanks to the dials, you can adapt the effect of the subwoofer to the room it occupies. If necessary, it can also control smaller satellites.

ASA80

Cube is cute! A subwoofer doesn't have to be an eyesore anymore. With the ASA80, ArtSound has produced an active subwoofer, packed into a compact cube design. The rounded corners soften the speakers' look. The 'big brother' of the pair, the ASA80, has an 8" patented driver that allows you to easily add space-filling bass to your living room. It is super easy to combine with the AS250, AS150 and others. Together with the new ASC350 center speaker and the AS350, you can even create a unique home theatre set.

COLOURS black

Shown here in a large living room, the ASA80 knows no limits. Even a 65m² space is not a problem.

TECHNICAL SPECIFICATIONS

FL-A80

The ultimate cinema experience with the ultra-tiny subwoofer: the FL-A80 makes it possible. This woofer combines an 8" driver with a built-in amplifier that generates 100W. This enables it to produce sound that can even fill the most spacious living room, enabling you to have the ultimate cinema experience right in your very own home. Thanks to its discreet design, you can give the subwoofer its own place in your interior, behind a curtain or chair, or under a sofa or cupboard. Thanks to the brackets supplied, you can also mount it on the wall. The FL-A80 may be easily adapted to suit your taste. The high-level inputs boost the latest in technical ingenuity. Thanks to the individual volume and phase control, you can easily install the subwoofer in any room you like.

You actually don't see the FL-A80 here. It's mounted behind the curtain, but still provides the living room with every deep vibration.

Radio

A MODERN RADIO WITH ALL THE TRIMMINGS

Even more than television, radio brings people together. But an ArtSound radio doesn't just transmit radio waves. It allows you to choose between wired or wireless, streaming, MP3 or USB, in short, all those things that make your musical experience personal and up-to-speed.

R3

Connect to the world!

You're a child of the world, with all its far-flung corners - that's what makes you so unique. The R3 works in a similar way. Its FM and DAB+ allow you to discover world music in all its diverse forms. Both the FM band and the DAB+ guarantee perfect reception. DAB+ ensures future-proof recognition.

In addition, the R3 incorporates a battery allowing you up to 8 hours of unlimited enjoyment.

The housing has a dual function: a timeless design and an ability to generate a warm, high-quality sound. Happy trails!

U3

Originally, the U3 was intended as a sturdy, old-fashioned shipyard radio, but it has since grown into a waterproof jack-of-all-trades with numerous possibilities. It comes complete with an AUX/MIC input, battery compartment, 12-volts connection (cigarette lighter), socket for headphones, LED lighting... All of this wrapped up in an unusually powerful tuner and speaker with a beautiful bass sound reproduction. This technical tour de force with its sturdy design can stand up to rough treatment. You can use this radio in the garden, poolside, in the middle of a home renovation, at the campground...

The U3 is an extreme radio. It is not only shock-resistant but can also stand up to dust, moisture, dirt, etc....

R11

Elegant simplicity combined with state-of-the-art performance places the ArtSound model R11 AM/FM table top radio a cut above its closest competitors. In true ArtSound tradition, AM/FM reception is excellent, providing clear and static-free listening. With only three dials, you can adjust volume, select AM/FM bands and precisely tune your station selection displayed in a softly-lit analogue display. An LED tuning eye assures your tuning will have the best reception for your selected station. In addition, it also comes equipped with a stereo headphone jack and facility for an external AM and FM antenna. Aux-in jack for playing your favorite MP3s and rec-out jack for routing to your recording equipment or external devices. Available in black, white and red with complementary metal speaker grill.

Ri60

INTERNET RADIO (SOURCE)

The Ri60 tells a story. The app pictures it. With this elegant, black jewel you can receive up to 10,000 radio stations world-wide. The device incorporates everything true aficionados want from a radio: WiFi, programming of up to five radio stations and an alarm function. The app allows you to zap from channel to channel without leaving the comfort of your armchair. It can be downloaded for free. Handy for use on your smartphone or tablet, but if you want the handheld remote control, we can supply that too. In short, the Ri60 is the radio of the future.

AirMusic Control by MAGIC SYSTECH INC. has been designed for internet radio. Available via iTunes or Google Play

multiroom

MUSIC IS A HOUSE WITH MANY ROOMS

ArtSound considers its mission to disseminate music and sound information as far and wide as possible. From an invisible box for your radio transmitter and your own sound sources over a device with volume controls for 6 pairs of loudspeakers to a simple volume dial on the wall: your personalised preferences need little space.

With us, perfection in sound takes absolute priority.

ART3.1 BT

Never has it been easier to fill an extra space with music. The highly compact ART3.1BT, with its discrete housing, comprises an FM/DAB+ tuner with six preset channels and the possibility to connect up to an external sound source. What's more, you can attach any Bluetooth-compatible device to this unit. Talk about musical freedom! Thanks to its concise dimensions, the device can be installed in a false ceiling, through the hole for the inbuilt speakers. The RF remote control supplied has the advantage that you don't have to be within direct sight of the ART3.1BT. This means you can choose to play whatever you want, at whatever volume, wherever you may be.

This ART3.1 has an amplifier with a built-in radio, DAB+ and even a Bluetooth module. Crazy Packs from ArtSound: **not only slightly crazy, but really quite smart – something to be proud of.**

SVC6.2

You can connect the SVC6.2 to six pairs of loudspeakers to one amplifier output. The device ensures that your amplifier will not be subjected to excessive load as a result. The practical dials on the front panel allow you to adjust the volume for each pair of loudspeakers separately. This makes it possible to create up to six different volume zones. The styling and finishing allows the SVC6.2 to blend in perfectly with your hi-fi installation.

COLOURS black / silver-grey

The rubber trim gives it a pleasant feel and a deluxe look.

description	volume control for 6 sets of loudspeakers
max. power	2 x 180W (input level)
loudspeaker output impedance	8Ω
amplifier input impedance	4Ω
dim. (h x w x d)	52 x 425 x 260mm
weight	4,51kg
colour	black / silver-grey

SVC4.2

COLOURS black / silver-grey

The rubber trim gives it a pleasant feel and a deluxe look.

You can connect the SVC4.2 to four pairs of loudspeakers to one amplifier output. The device ensures that your amplifier will not be subjected to excessive load as a result. The practical dials on the front panel allow you to adjust the volume for each pair of loudspeakers separately. This makes it possible to create up to four different volume zones. The styling and finishing allows the SVC4.2 to blend in perfectly with your hi-fi installation.

description	volume control for 4 sets of loudspeakers
max. power	2 x 80W (input level)
loudspeaker output impedance	8Ω
amplifier input impedance	4Ω
dim. (h x w x d)	52 x 314 x 240mm
weight	1,93kg
colour	black / silver-grey

AMP1250

You can use the AMP1250 to control different loudspeakers, or to supply extra power to certain zones in a multiroom system.

The AMP1250 is a multichannel amplifier allowing you to control 12 (mono) or 6 (stereo) loudspeakers (zones). Every stereo loudspeaker zone is allocated the generous power capacity of 2 x 50 watt. It is also possible to use the amplifier in a bridged configuration which allows you to draw on 6 x 100 watt of power. The AMP1250 is perfectly capable of serving as a central power unit for an existing multiroom sound system, but may also be used as a stand-alone. This allows you to listen to one designated tuner, CD, mp3 player, etc. in different rooms and using local volume controls (see page 55) you can adjust the sound as you like. What's also nice to know is that the management circuit will automatically turn on or off the amplifier levels when a signal comes in. And of course, the unit is very well-protected.

description	multichannel amplifier
frequency range	20Hz - 20kHz
output power	12 x 50W (bridged 6 X 100W)
